Welcome! We would like to welcome you to our office. We are confident that we will provide you with the professional care that you expect. We look forward to seeing you and will be happy to answer any questions before your appointment or at any time during treatment.

What is a Periodontist? A Periodontist is a dentist with additional years of study specializing in evaluating and treating periodontal disease. He/she performs both surgical and non-surgical treatments of the gums. In addition, our practice includes Periodontists who specialize in dental implants.

What will happen? A thorough examination will be performed to check your gums for bleeding, swelling, firmness, recession, or other signs of infection. There will also be measurements for bone loss or loose teeth. X-Rays may be taken and your problem and treatment will be thoroughly explained. You may be referred to our financial coordinator for treatment cost estimates and payment options.

What to bring?

- **Completed Patient Medical History** Please read each page front & back thoroughly. Fill out completely, initial & sign where requested before your appointment.
- **Dental Insurance card(s) & Driver's license** for identification purposes.

What happens next? We will send a full report to your dentist and you will receive a copy of the report. If treatment is necessary, we will help you with convenient scheduling.
